

Ideal Projector for Business Professionals: Toshiba T9

Neuss, 20 December 2005

Toshiba Projection & Display Technology (PDT), leading provider of professional data and video projectors, now presents the T9, a high-performance DLP projector for professional applications that offers outstanding value for money. The sleek, elegant T9 delivers 1024 x 768 XGA resolution, 2,000 ANSI lumen brightness and 2,000:1 contrast, guaranteeing outstanding image quality in a wide variety of environments and projection conditions. Operating the T9 in ECO Mode cuts fan noise while also extending lamp life. The remote control unit supplied features a mouse remote function and laser pointer as valuable aids in business presentations.

Toshiba's new T9 is aimed at business users seeking a compact device with high-quality resolution, brightness and contrast. Its low weight of only 2 kg will be appreciated by frequent travellers, and a further practical benefit is the intuitive operation using icon-based on-screen display. The remote control unit supplied, featuring integrated laser pointer, enables presenters to move freely around the conference area.

The T9 provides a flexible range of connections, with RGB and video inputs (S-Video, RCA) plus RGB and audio outputs for smooth connection to PCs and notebooks. The separate audio connection enables the projector to be hooked up to external sound systems for presentations in large rooms.

Compact high-tech devices such as projectors or notebooks are tempting for thieves, particularly in out-of-office presentations. The Toshiba T9's password and panel lock functions prevent the projector from being operated by unauthorized persons, and thus also act as a deterrent for potential thieves.

"The T9 is our compact, high-performance projector offering convincing

Press Information

value for money to professional users", says Gerd Holl, General Manager at Toshiba Projection & Display Technology (PDT). "With high image quality plus practical features and weighing in at only 2 kg, the concept behind the Toshiba T9 is a winner. We expect the T9 to be the optimal answer to the needs of discerning business customers."

Price and Availability

The T9 is available from distributors and specialist retailers from January 2006 at a manufacturer's recommended retail price of 1,290 EUR plus VAT.

For your convenience, Toshiba has set up an infoline (0.12 euros/min from the Deutsche Telekom landline network) on 01805 229232 (in Germany only).

About Toshiba Projection & Display Technology

The Projection & Display Technology (PDT) division markets a comprehensive portfolio of data and video projectors plus a selection of LCD flat panels and plasma screens. Its offerings are intended for a broad spectrum of target groups. In the professional projectors segment, Toshiba distinguishes between the mobile class of projectors (lightweight models of up to 3 kg) and the performance class (primarily for conference applications, but also for permanent installation). PDT also focuses strongly on the forward-looking home cinema projector segment. As a systems provider, the Projection & Display Technology division is committed to developing complementary solutions for mobile presentation and wireless LAN applications.

PDT is responsible for distribution in over 50 countries in Europe, the Middle East and Africa. Toshiba employs 166,000 people worldwide and around 4200 people in Europe.
